X Not applicable. Represents date prior to becoming a state.

Note: The method for calculating the apportionment of representatives, or seats, in the U.S. House of Representatives among the states was the Method of Major Fractions for 1910 and 1930, and it was the Method of Equal Proportions for 1940-2020. There was no reapportionment for 1920.

Table C2. Apportionment Population and Number of Seats in U.S. House of Representatives by State: 1910 to 2020 (continued)

² In 1912, Arizona and New Mexico became states and each were granted a seat—temporarily increasing the size of the House to 435. In 1920, the Census Bureau did transmit apportionment counts to Congress, but Congress did not reapportion. The size of the House during the next apportionment, in 1930, was fixed at 435.

³ In 1900, there were 386 seats in the House. In 1907, Oklahoma became a state and was granted 5 seats—temporarily increasing the size of the House to 391. The size of the House during the next apportionment, in 1910, was increased to 433.
